

The diagram on the left shows a scattering process with two incoming particles (momenta p_1 and p_2) and two outgoing particles (momenta $p_1 - k$ and $p_2 - k$). A vertical red line separates the diagram into two regions. The left region contains a loop with a wavy line (photon) and a solid line (electron). The right region contains a loop with a wavy line (photon) and a solid line (electron). The momenta are labeled $p_1 - k$, $p_2 - k$, and k .

$$= \text{disc}_{p_1^2} \text{disc}_{p_2^2} \left(\text{Diagram} \right) + \mathcal{O} \left(\frac{\Lambda^2}{q_h^2} \right)$$

The diagram inside the large parentheses is a loop diagram with a wavy line (photon) and a solid line (electron). The momenta are labeled p_1 , p_2 , and k . A red line with a cross at the end is attached to the loop. The word "soft" is written below the diagram.
