

$$\begin{array}{c} \text{Diagram 1} \end{array} = \text{disc}_{p_1^2} \text{disc}_{p_2^2} \left(\begin{array}{c} \text{Diagram 2} \end{array} \right) \Big|_{\text{soft}}$$

The image shows a mathematical equation involving Feynman diagrams. On the left is a diagram with a vertical red line. To its right is an equals sign followed by the product of two disc operators, $\text{disc}_{p_1^2}$ and $\text{disc}_{p_2^2}$. This is followed by a large right parenthesis enclosing a second Feynman diagram. To the right of the parenthesis is a vertical line with the word "soft" below it.
