

$$= \text{disc}_{p_1^2} \text{disc}_{p_2^2} \left(\left(\text{Diagram} \right) \Big|_{\text{soft}} \right) + \mathcal{O} \left(\frac{\Lambda^2}{q_h^2} \right)$$

The diagram inside the large parentheses is a circular loop diagram. It features a fermion loop (solid line with arrows) and a gluon loop (wavy line). A red line with a cross at its end points to a specific vertex within the loop, likely indicating a soft limit or a specific interaction point.
